

Apply filters to SQL queries

Project description

I used SQL to investigate login activity and retrieve employee information for security updates. I filtered database records using conditions such as dates, times, countries, departments, and office locations.

Retrieve after hours failed login attempts

The query i used to select failed login attempts made after 18:00 was :

```
SELECT *  
FROM log_in_attempts  
WHERE LOGIN_TIME > '18:00'  
AND success = 0;
```

Retrieve login attempts on specific dates

To select login attempts made on specific dates i used

```
SELECT *  
FROM log_in_attempts  
WHERE login_date = '2022-05-08'  
OR login_date = '2022-05-09';
```

Retrieve login attempts outside of Mexico

To retrieve login attempts outside of Mexico I used the query :

```
SELECT *  
FROM log_in_attempts  
WHERE NOT country LIKE 'Mex%';
```

Retrieve employees in Marketing

To retrieve employees in marketing i used the query

```
SELECT *  
FROM employees  
WHERE department = 'Marketing'  
AND office LIKE 'East%';
```

Retrieve employees in Finance or Sales

To retrieve employees in the Finance or Sales department I searched the query

```
SELECT *
```

```
FROM employees
```

```
WHERE department = 'Finance' OR department = 'Sales';
```

Retrieve all employees not in IT

To retrieve all employees not in IT I searched the query

```
SELECT *
```

```
FROM employees
```

```
WHERE NOT department = 'Information Technology';
```

Summary

This project helped me practice using SQL and filter through databases using AND, OR, NOT and SQL operators.
